

FMIS

Facilities Management Information System

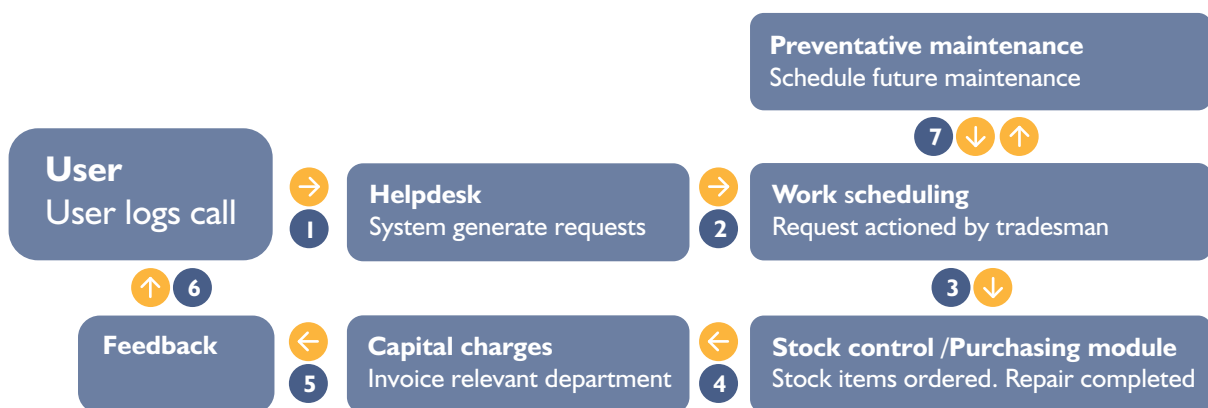

The new way in facilities management

FMIS is a flexible and adaptable estates and facilities management system, with a comprehensive set of features, enabling total management of facilities, estates and assets.

Estates and facilities departments in organisations have to deal with a diverse range of procedures, including, the provision of new buildings, refurbishments of existing buildings, the replacement and maintenance of plant, and the maintenance and administration of a wide range of equipment and material based assets.

FMIS is an innovative and easy to use IT software package designed to enable Facilities Managers to deal with all these operations in an efficient and structured manner, thereby increasing productivity and enabling operations to run more smoothly.

FMIS also includes a help desk facility for logging incoming telephone calls relating to maintenance issues.

FMIS

Facilities Management Information System
